ACS Enterprises Taps Rob Cyngiser As Director Of Engineering

Walnut, CA, January 14, 2008 – ACS Enterprises™ (ACS) named motion picture veteran Robert Cyngiser as Director of Engineering Services. Cyngiser brings a 12-year history of technology, engineering, and service experience to ACS's management team. In his new position, he will direct the efforts of ACS's engineering programs related to digital cinema, consulting, and product development for the entertainment industries.

“We’re excited to have Rob join the ACS team and lead our engineering service efforts,” said Jose Alvarado, Chief Executive Officer. “His broad experience in product technology and relationships in the postproduction/distribution community will provide invaluable business knowledge to continue our strategic growth.”

Before joining ACS, Cyngiser was Manager, QC Engineering at NT Audio, where he was responsible for quality control standards for their screening rooms. Prior to NT Audio, Cyngiser held various engineering management roles at Sony Electronics where he worked on the development and deployment of the SDDS format world wide. Cyngiser holds an engineering degree from California State University at Long Beach.
